

Junior Unity 2D Game Developer

Unity · C# · React JS · Remote-Friendly · Entry–Mid Level

📍 Location	Remote / Hybrid — Jordan & MENA Region Welcome
📅 Type	Full-Time Part-Time Contract
💰 Salary	\$800 – \$1,800 / month (based on experience)
🎓 Experience	1–3 Years (Indie / Personal Projects Count)
📱 Platforms	Android · PC · Web (itch.io, Google Play)
📅 Start Date	Immediate / ASAP

ABOUT THE ROLE

We are a small, creative game studio looking for a Junior 2D Game Developer with a passion for building polished, fun experiences. This role is perfect for a self-driven developer who has shipped indie games and wants to take the next step into a professional studio environment. You will own gameplay features end-to-end — from design discussions to deployment — while collaborating with artists, designers, and fellow developers.

WHAT YOU'LL DO

- Develop and maintain 2D games and game features using Unity and C#
- Implement gameplay mechanics, character controllers, collision, and game logic
- Integrate artist assets (sprites, tilemaps, animations) into Unity scenes
- Build and publish game builds to Android (Google Play) and PC platforms
- Contribute to frontend web tools or companion sites using React JS when needed
- Participate in Scrumban/Agile sprint planning, standups, and code reviews
- Use Git for version control and collaborate via GitHub
- Document your work and support knowledge sharing across the team

WHAT WE'RE LOOKING FOR

Core Requirements

- Hands-on experience with Unity Engine and the Unity 2D toolset (Tilemap, 2D Physics, Cinemachine)
- Proficiency in C# — solid understanding of OOP, game loops, and event-driven patterns
- At least one published or publicly available game project (itch.io, Google Play, or similar)
- Familiarity with Git and collaborative development workflows

- Strong problem-solving mindset and attention to gameplay feel and quality

Bonus Points

- Experience publishing Android apps to Google Play (APK signing, store listing)
- Knowledge of React JS and Tailwind CSS for web-facing game tools or landing pages
- Experience leading or coordinating a small development team
- Familiarity with Scrumban or similar Agile methodologies
- Video editing or multimedia production skills (content creation, trailers, devlogs)
- Arabic language proficiency — a big plus for our MENA-focused projects

TECH STACK

Unity	C#	React JS	Tailwind	Git	Android	GitHub	Linux
-------	----	----------	----------	-----	---------	--------	-------

WHAT WE OFFER

- Competitive salary adjusted for MENA cost of living
- Fully remote-friendly team with flexible hours
- Creative ownership — your ideas will shape real products
- Mentorship from senior developers in a friendly, low-ego environment
- Games industry exposure: itch.io releases, Google Play publishing, game jams
- Access to Unity Pro license, asset packs, and relevant software tools
- Opportunities to grow into a mid-level or lead developer role

HOW TO APPLY

Send your application to careers@yourstudio.com with the subject:
"Junior Unity 2D Dev — [Your Name]"

Please include:

- Your CV / resume
- Link to your portfolio, GitHub, or a published game (Google Play / itch.io)
- A short paragraph about a game mechanic you built and are proud of

Applications are reviewed on a rolling basis. We can't wait to play your games. 🎮
